

Job Position: Mechanical/Design Engineer (Graduate)

Job Location: Beeston, Nottingham

Company Profile:

Metron Advanced Equipment is a composites engineering consultancy with a very strong background in designing ground breaking and world beating bicycle frames and components. Our bicycles have been ridden by the world's best leading to over 58 Olympic and World Gold Medals, as well as Tour de France victories. The founder's background blends high performance carbon fibre and cycling. Our company is very proud to include amongst its clientele British Cycling, Pinarello and Team Sky. Our designs have been ridden by Sir Chris Hoy, Sir Bradley Wiggins and Chris Froome.

The Position:

We would like to incorporate in our team a strong graduate eager to explore the engineering behind the cycling world. The successful candidate must be hard working, methodical, imaginative, willing to listen and learn, apply logic to achieve the best solution within given time and budget.

Essential Skills:

- BEng in Engineering (Mechanical/Design/Composites or similar) 2:1 or higher
- 3D CAD Skills (Rhinceros, SolidWorks or similar), as well as 2D Drawings
- Good Bicycle Knowledge
- Outstanding Problem Solving Skills
- Excellent Communicator (verbal, written)
- Proficient in the use of Microsoft Office Word, Excel, Power Point

Desirable skills:

- Stress/FEA Analysis
- Aerodynamics

Salary:

£19000
